Re: Letter of Recommendation

Dear Mr. Whitney,

This letter serves as a letter of recommendation for Chris Doyle, and by extension, Doyle Systems, LLC.

We have had excellent relationship with Doyle Systems' president, Chris Doyle for almost 16 years. As a Consulting Engineer specializing in MEP systems engineering, we at GHT have had the pleasure of working with Chris on a number of different projects, with a variety in the project types and contractual arrangements, both Design-Build and Design-Bid-Build. He and his staff have always distinguished themselves with their hard work, partnering manner, dedication to quality, professionalism, integrity, and care in maintaining our collective relationships with our clients.

Some of Chris' more notable projects designed by GHT:

1. The World Bank, Building H, Chiller & Cooling Tower Replacement.
2. The World Bank, Main Computer Complex, Chiller & Boiler Installation.
3. The World Bank, Main Computer Facility, AHU Replacement.

* Please note that all of the above projects were awarded Washington Building Congress Craftsmanship Awards for their outstanding installation quality.

We have found that Chris and his staff excel at tackling the most challenging projects. We particularly consider him to be a "go to person" on difficult installations, especially those in occupied facilities.

GHT Limited unreservedly gives Chris Doyle, and by extension, Doyle Systems, our highest recommendation. We would not hesitate to pursue project opportunities with him and his company.

Please contact me directly if I could be of further assistance with inquiries about Chris, his staff or his company Doyle Systems, LLC.

Sincerely,

GHT Limited
