RE: Doyle Systems, LLC – Letter of Recommendation

Subject: Chris Doyle  
President  
Doyle Systems, LLC

To whom it may concern,

Centennial Contractors Enterprises, Inc. is a national general contracting firm that manages performance-based construction programs at large Federal, State, Local governments facilities and private enterprises. I have worked personally with Chris Doyle for well over a decade as the mechanical subcontractor for our projects at the World Bank, DC Housing Authority, IMF, Andrews Air Force Base and others. We have been very comfortable trusting our company's reputation with him on many complicated mechanical projects not only because of his command of technical issues, understanding of client's needs, and outstanding team approach to projects, but also for his ability to manage expectations with a sense of urgency and yet ensuring consistent performance, timely paperwork, and ultimately a successful project delivery.

Some of those individual project successes are:

1. World Bank IDIQ Contract - Term Contract work performed from 1994-2009 (average of 250 project per year), each ranging in value from \$100 to \$1,000,000.
2. The World Bank, Building D, Air Handling Unit Replacement Project - Replaced six large AHU's on a compressed schedule in an occupied building. Approx. Value \$400,000.
3. The World Bank, Building H, Chiller and Cooling Tower Replacement - Replace two 600-ton Carrier chillers and three 400-ton cooling towers including piping and chilled water and condenser water pumps. Approximate value \$1,400,000.
4. The World Bank, Main Computer Complex Chiller & Boiler Replacement - Replace two 250-ton Carrier Chillers and five HW Boilers. Approximate value \$1,000,000.
5. The World Bank, Building H, Main Computer Facility, HVAC AHU Replacement - Replace fifteen computer room A/C units while room was fully occupied and operating. Approximate value \$800,000.
6. The World Bank, Design/Build Boiler and AHU Upgrade Energy Project - Design/Build and install new steam boiler and humidifier system. Approximate value \$1,600,000

**Centennial**  
contractors enterprises, inc.

I have observed Chris's conscientious and ethical standards over the course of numerous IDIQ and JOC projects where working through pricing and scheduling constraints have been critical. Considering my high level of confidence in his performance, and appreciating his innovative and competitive spirit, I look forward to engaging Doyle Systems in our future projects.

Respectfully submitted,

Ken Bose
